Thanks Eva. Sharing my notes as well. These are based upon Steve's memos and boring logs

Subject: characterization data figures

I had these figures made up to try to keep track of all the contaminant distribution data in each of the 3 zones, I believe they include all the data we had up until the Nov 18 data on LNAPL recovered from wells (new information in the week ending Nov 18 is not included). Hope they help you assimilate the data. I will update these periodically as we get additional data.

Carolyn, I will be sending you hard copies that are large enough to read, you better give me your address again. I have a couple other copies if people are interested -
